Summary — An enthusiastic web Artisan with expertise in front-end technologies and solid architectural skills in the PHP-Laravel framework, capable of building dynamic,scalable and responsive web applications.

Skills

Programming Languages	C, Javascript, SQL, PHP
Web Technologies	Wordpress, HTML-5, CSS-3, Bootstrap-5.3, Git, GitHub, AJAX, JSON, Webpack, jQuery,Redux
Frameworks	Bootstrap, React-JS, Next-JS,Laravel,Mysql(RDBMS)
Interests	Machine Learning, Devops, NextJS,NestJS

Experience

Wintel Limited   December 2024 – Ongoing
Junior Full Stack Developer

- Architect and develop scalable web applications using React/Next.js for the front-end and PHP-Laravel for the back-end.
- Design and integrate complex APIs to ensure robust communication between various systems and services.
- Collaborate with cross-functional teams to translate Figma designs into functional, responsive interfaces.
- Optimize application performance and implement best practices for code quality and maintainability.
- Participate in code reviews, mentoring junior developers, deploying, and continuously improving development processes.

SoftBd Ltd.   June 2024 – December 2024
Junior Software Engineer

- Proficient in Bootstrap 5 and other front-end-technologies (React,Next), creating responsive designs and user interfaces.
- Strong understanding of the Laravel Framework, building efficient and scalable applications.
- Experience with Git for efficient version control in collaborative development.
- Thrives in collaborative environments, emphasizing innovation and continuous improvement.
- Developed web applications using raw PHP ,MySQL also with Yajra Datatable,Laravel Voyager demonstrating proficiency in backend development.
- Experience working with stateless APIs and Object-Relational Mapping (ORM) frameworks, such as Laravel's Eloquent ORM, to interact with databases and build web applications.
- Understanding of Solid Principles, Design Patterns, Agile Methodology
- Worked more than 7+ diverse enterprise level Web applications .

Education

BSc in Computer Science and Technology, Green University of Bangladesh (2018 – 2023)
Major: Machine Learning, CGPA: 3.10

HSC – Kushtia Government College (2013 – 2015)
Group: Science, GPA: 5.00

SSC – Kushtia Zilla School (2008 – 2013)
Group: Science, GPA: 5.00

Projects

Housing Management System
A system for managing tenant details, rental payments, and property records. Developed using Laravel for Backend APIs and Next.js for the frontend. Includes automated payment reminders and tenant reports.

Pesticide and Dealer Management System
An inventory and dealer tracking system for pesticide distribution. Built with Laravel Blade and Yajra Datatables for dynamic data management.

HR Payroll System
A platform to automate payroll and attendance management. Currently transitioning from Voyager views to Laravel's static logic for better performance and flexibility.

Laravel E-commerce and Blog System
E-commerce and blogging systems developed with Laravel and Blade templates. Includes payment integration and user authentication. *GitHub Repositories:* **E-Commerce Parcel Laravel Blogsite**

Bangladesh Lyricist Association
A comprehensive platform for lyrical content. Explore the public site at **Bangladesh Lyricist Association**.

Bangladesh Lyricist Association Admin
An administrative interface for managing lyrical content. Access the admin panel at **Bangladesh Lyricist Association Admin**.
